

## Stetson Ramey

👋 – Thanks for viewing my resume. I'm a "hard materials" engineer by education, but a "software/data wrangler" by choice. Running a few small businesses I've also learned how to listen, how to sell, how to manage, and how to work really hard.

I love to figure things out: why is my water heater making that noise or what is an MCP server?

When I'm not pushing pixels on a computer I enjoy:

- making great pour over coffee
- baking pies
- traveling to national parks, or anywhere scenic
- entertaining my cat Lemon
- olympic weightlifting

-  English  
Professional working
-  Spanish  
Con conversationally Fluent

## Education

 UNIVERSITY OF WYOMING  
Master of Science – Geotechnical Engineering  
2009

 UNIVERSITY OF WYOMING  
Bachelor of Science – Civil Engineering  
2004-2008

## Work Experience

- 2009 – 2013  
 Construction Engineer  
Kiewit Power Constructors  
Shannon & Wilson  
1. Construction engineering on \$100mil+ scale natural gas power plants. Mostly working with crews of Boiler Makers / Pipefitters running welding operations planning, managing, and tracking work. Fast paced, high stakes, high stress.  
2. Geotechnical engineering for a consultant on various projects in LA and mega bridge projects in Canada.
- 2012 – 2015  
 General Manager  
CPM Fitness  
Helped a friend grow a gym from ~70 members to 200+. Ran most of the tech, coached classes, sold sold sold, and got really really fit.
- 2015 – 2019  
 Great Plains Painting  
Owner / Operator  
Great Plains Painting  
<https://greatplainspaintingco.com>  
Started from scratch, built it up to about \$1mil/yr in gross revenue. Sold to my General Manager in 2019. I learned how to build both low-code / no-code and custom coded tools due to this business.
- 2016 – Present  
 'Tis the Season  
Owner / Operator  
'Tis the Season  
<https://tistheseasonkc.com>  
Grew from 20 customers in year 1 to 900+ customers in year 8 (\$300k-ish gross revenue in about 70 days). I automated all invoicing, SMS communication, scheduling, and routing of the customers. Our office manager and I run all the tech easily – processing about 500 leads / season and start to finish workflows on the 900 existing customers. Airtable is the central hub, and we send / receive data from our other tools inside of our Airtable platform.
- 2022 – Present  
 Senior Consultant  
Freelance  
Worked primarily for:
  - GAP Consulting
  - Ace Workflowbuilding internal and external tools for SMBs and Multi-National or Fortune 500 companies. Most of the time, Airtable is the data layer and we add off the shelf or or build bespoke integrations and workflows using that data.

## Tools/Skills

 Airtable Data, Hub	 Make Automations	 Glide App Builder, Automations, Advanced UI	 pipedream Pipedream Advanced custom code automations	 Zapier Automations
 Javascript custom automations	 NodeJS Server code / custom automations	 HTML Custom UI / Display	 CSS Style your custom stuff	 Astro Web Framework

## Other Tools

I've worked with enough it's hard to list them all, and I work with new ones on a weekly basis. If I don't know a tool, I can learn it fast. Sometimes I read API docs to relax before bed 🧘.

I love building cool stuff that looks awesome, runs reliably, is easy to maintain, and lets computers do the stuff they're good at so humans can do the stuff they're good at.
